

Pattern in Architecture and Graphic Design

Mecanoo Posters Serie

Thanks for downloading this Poster Serie inspired by Mecanoo Architectures

Hi, my name is Giuseppe Gallo, Creative Director of Mirabilia, a communication design studio founded on 2008, based in Palermo, Italy.

I approached to graphic design during my studies in Architectural Engineering at the University of Palermo, where I graduated in 2013. I have a strong interest in computational methods for architecture and Interaction Design.

I created this series of posters because I wanted to graphically reflect on use of patterns in Architecture: Established the extremes, the key is to define a balanced situation, the high amount of information in a clear and recognizable way.

Many Architects exploit patterns to define environments, generate order and communicate information. In the current landscape one of the practices that does it best in my opinion is the Dutch office Mecanoo, founded in Delft in 1984. So I chose their architectures for this project.

After releasing the first set of three posters, I came in contact with Mecanoo, which spotted them online. Then I developed six more posters, for a total of nine, available for free in **high res CMYK A3 .pdf files for print** and **low res RGB .jpg for web and screens**.

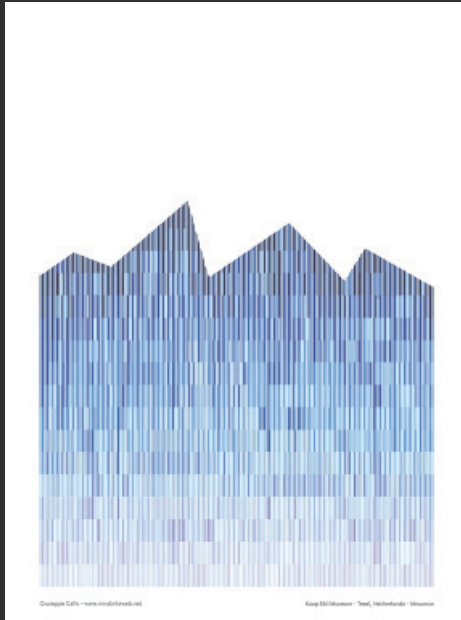

I want to say Thanks to [Mecanoo](#) Team, especially to [Eliano Felicio](#), for their suggestions and precious advices.

Hope you like them. Let me know your thoughts!
Feel Free to contact me even to say Hello
